

## AMS FleetManagerLite

### Improving asset management, safety and customer service

The AMS FleetManagerLite is a quad band/GPRS/GPS tracking unit designed to be deployed globally. A simple 3 wire installation design which delivers back real-time asset monitoring information. Each event includes; location, date, time, speed, direction and status information. Events include:

- Ignition/power on
- Ignition/power off
- Starting
- Stopped/parked
- Idle warning
- Excessive idle warning
- Input 1 closed/open (Panic Button)
- Privacy on/off
- Over speed start/stop

This information is delivered via our web site delivering information to those that need it.

See AMS web interface document

### Mick George Ltd

Operating with a single tipper truck in 1978, the company's commercial fleet size has now grown to be in excess of 90 HGV vehicles. We specialise in bulk excavation & earthmoving services, a wide range of skip hire and waste management services and aggregate supply. AMS have supplied us for over 2 years and have provided outstanding service assisting us in managing our fleet, providing excellent customer service and maximising operational efficiency.

FMLite provides us visibility of live location data ensuring we employ resources efficiently. The system allows us to monitor Working Time Directive and produces Time Sheets weekly at the push of a button.

### British Red Cross

AMS have transformed our operations providing live location data and writing specific reports that we require within the organisation, a highly flexible cost effective solution.

Gavin Black British Red Cross

### Cartrefi Cymunedol Gwynedd

We selected Asset Monitoring Solutions as our vehicle tracking provider in October 2010 after considering 5 different suppliers. AMS monitor over 50 vehicles within the organisation with the aim of reducing our fleet mileage by 10% in the next year and effectively employing resources in the field.

As an organisation we have been extremely impressed with the capabilities of AMS from onsite training to a rapid and seamless deployment. During the selection process we were surprised to find that AMS were not only leaders on product but also on price making them a natural selection in meeting our strategic goals.
