

AMS Locator

Improving asset management, safety and customer service

The AMS Locator is a quad band/GPRS/GPS tracking unit designed to be deployed globally. A simple tack and trace solution providing information of asset movements. Each event includes; location, date, time, speed, direction and status information. Events include:

- power on
- power off
- timed events
- low power notification (up to 16 hours use)

This information is delivered via our web site with secure password and hierarchal access controls delivering information to those that need it.

See AMS web interface document

Product Use

The AMS Locator is a small versatile unit with various options for use

- **Parcel tracking** sending parcels through a delivery system and tracking their progress.
- **Agency driver** a handy edition to a fleet to monitor a rented vehicle without an installation requirement
- **Asset Tag** secrete within a valuable asset
- **Low level personal trackers** can be used to locate individuals and trace movements.

“A unique solution to a common problem”

“This small piece of equipment made a big difference in understanding the movements of parcels within the organisation”.

UK Mail

The UK Mail Group (formerly known as Business Post Group) is the largest independent parcels, mail and logistics services company within the UK, offering innovative delivery solutions both locally and worldwide.
